RE: Decontamination of Houston Office

This communication is to serve as both a letter of appreciation and recommendation to Safety Shield and Craig Price. The timely response and ability to continue our business was very important to our customers and profitability.

We had an employee that contracted Covid-19 the last week of May 2020; the initial reaction from our employees was fear and our upper management was contemplating shutting down the office operation for 14 days. I contacted Crag about decon spraying our office, wiping it clean and training the employees.

His was response was beyond professional – Craig was in the Houston office the next morning and implemented an action plan to spray and wipe down our office. Our employees felt like we made their well being a priority and they most importantly felt safe.

The employees immediately returned to work and our business was not interrupted. I would recommend that any business that has concerns about the spread of Covid-19 utilize Safety Shield.

Our staff and employees thank you very much for your response!!

Best Regards,
